

akustisch austarierte Raumgestaltung

For 35 years and throughout the world, Anne Minors has created gathering spaces that balance the technical needs of lighting, sound and rigging with forms that enhance acoustics and rapport between stage and audience. With colleagues specialising in lighting, sound, stage engineering and audio-visual design, Sound Space Vision provides a complete performance consultancy service -- from helping clients define the brief, through performance planning of the building, auditorium design, technical specifications and site monitoring to the opening performance and beyond.
