

marmoriertes Holz

SNEDKER STUDIO

Pernille Snedker Hansen has repurposed an old marbling technique giving nordic wood a supernatural organic, colorful pattern. Created slowly drop by drop of paint on a water surface. The pattern reflects the growth patterns in the natural wood. Gently the wood is laid on the water surface and the pattern transferred to the wood.

The unique ornaments of wood are perceived with renewed visual intensity, and seen as the ornamentation of the wood itself has been enlarged and intensified. The wooden planks are made one by one, and thus each floorboard acquires a unique pattern of coloured stripes. Marbelous Wood is produced as made-to-order, The surface is handcrafted by the designer-maker herself, Pernille Snedker Hansen, with a marbling technique. So production time needs to be taken into consideration when you plan to use Marbelous Wood for your interior project. Marbelous Wood comes in 5 different pattern designs: Wave, Arch, Stripe, Marble & Sumi. Each with their unique reminisce of ornamentations in wood.

We can also design a personal Marbelous Wood colour scale for your specific interior project.
